## HOT MIX

- Our hot mix is heated first then mixed to achieve the high standards that we have set
- It is supplied in 25kg bags
- Shelf life of 12 months
- Patching and pothole repairs
- Results are comparable to HMA
- conventional method used during production and custom built ovens may be supplied for on-site production
- The operation of this on-site custom built ovens is highly labour intensive

## Conventional And Hand Operated Chip Spreader

- We use highly labour intensive hand operated chip spreader
- For upgrading of gravel roads to surfaced roads
- New roads can be built by using same method
- Existing roads are also easily maintained using the hand-operated chip spreader
- Municipality may use its staff to maintain its roads
- We provide training to our clients for maximum results
- Low costs compared to conventional equipments which are also available
- It's ideal for use by emerging contractors
